DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Amendment/Remarks, filed June 1, 2004, with respect to claims 1 and 3-8 have been fully considered and are persuasive. The rejection of claims 1 and 3-8 has been withdrawn.
2. The following is an examiner's statement of reasons for allowance: In Schwartz (US 5,846,200) discloses a method of using blood pool contrast agent with ultrasound to measure blood flow, however the method do not include measuring partial pressure of oxygen or determining the blood artery and hematocrit from the data. Similarly, Tournier et al (US 5,587,199; 5,545,395, 5,464,696) disclose a method to use blood pool as a contrast agent in MR imaging to image cardiac chamber, however the method do not include measuring partial pressure of oxygen or determining the blood artery and hematocrit from the data. In addition, neither Schwartz nor Tournier et al render obviousness to use the partial pressure of oxygen or determining the blood artery and hematocrit from the data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
